

## Position Available for

# Medical Toxicology Fellowship

The University of California at Davis has an opening in its 2 year medical toxicology training program starting July 1, 2010. This ACGME approved fellowship provides comprehensive training in clinical and medical toxicology with extensive opportunities for patient care, translational research, graduate education, and teaching. UC Davis is a division of the California Poison Control System; an integrated system receiving over 270,000 calls/year. Educational experiences include formal didactics, in-patient rounds and active clinical consultation service; high-fidelity simulation training; educational opportunities with emergency medicine residents, medical students, and pharmacy students; critical care toxicology; hazardous materials toxicology; hyperbaric medicine; occupational, environmental and regulatory toxicology as well as administrative and medical direction of poison control systems. Applicants must qualify for California licensure and have completed a residency in Emergency Medicine, Internal Medicine or Pediatrics. This position is open until filled but no later than June 30, 2010. Estimated starting salary \$75,000.

The clinical faculty bring tremendous diversity to the fellowship. Opportunities not only abound in traditional academic medicine, but also in state and federal public health, health care policy in both an HMO organization and within the Veterans Affairs system and occupational and environmental medicine.

The University of California at Davis located in Sacramento is surrounded by some of California's most popular attractions, all within easy driving distance: Lake Tahoe and the Sierra Nevada mountain range, Yosemite National Park, San Francisco and the Carmel/Monterey Peninsula, Mendocino and North Coast shores, and the "wine country" of the Napa and Sonoma Valleys
